

## New Age

It only takes to go to your nearest esoteric book store to be blown away by the huge amount of information available representing many ideas, beliefs, perceptions, practices and more that have been put together as early as the 18th century, but more intensify in the past 40 years. Many of the streams of thought are without a doubt a combination of ancient esoteric and exoteric practices coming from Hinduism, Buddhism, Hermetics, Egyptian philosophies, Taoism and more. There is a banquet out there for all the seekers from basic metaphysics to the science of the Merkaba and more.

### Limitations of the New Age thought

- 1- False masters and teachers in every corner; it is actually the blind leading the blind. There seem to be a few if any all over the world that actually have attained true Self Realization and Enlightenment.
- 2- The greater percent of the teachings as we comment before are a compilation of knowledge from other sources, while others are said to come from Extraterrestrials Sources, Angels, Masters of Light, higher Dimension etc. All this information is filter through the lenses of the unrefined undisciplined mind of those that receive these messages and the vast majority of times are in fact demons passing themselves as teachers. Yes, there are demons in the higher dimensions not only in hell as many think. There are also evil ET intelligences posing as ancient masters and channeling through both good and bad individuals. Satan's web stretches beyond what people currently can imagine.
- 3- Many people become very intellectual and go deep into fascinating books such as those by Alice Bailey, JJ Hurtak, Urantia Book, etc all from great beings of light, but the individual get lost within all that knowledge and forget his relationship to God.
- 4- There is a lot false information coming thru this false new age gurus and teachers that contaminate the consciousness of the followers. One simple example: It is common knowledge in Metaphysics the existence of the Ascended Masters, the Great White brotherhood, the etheric temples of light and more. They have names for dozens and dozens of Ascended Masters and Cosmic Beings, when in truth God has shown us that there are no more than five Ascended Masters in all the universes, parallelities, probabilities, dimensions, and worlds, yet people believe in many false Ascended beings promoted by erroneous information from fake or mislead teachers and messengers. Only a few of those so call Ascended Masters are in true spiritual beings of great stature, such as Kuthumi and el Morya, but they are not Ascended Masters. So, this train of thought have created the illusion that the individual Ascension can be attain by anyone in this lifetime and people work so hard to that goal that the Ascension becomes a more important goal than God Himself. All this nonsense comes from ignorance about true evolution of the soul and the reality of the path of initiation towards the Ascension. The

material mind can not conceive the level of evolution that souls most attain to reach the culmination of the path of initiation (not evolution) that is the Ascension towards God. There is not such a thing as an individualized presence of God for everyone, there is only the One True Divine God, connected to all his creations.

5- As we said there is so much theory and practices that the individual forgets God and becomes engross in the rush of learning and attaining like practicing Reiki for a while and then Astrology, then contact with Angels, then meditations in the light, then astral projection, then tarot, then channeling, then energy empowerment and initiations etc. The seekers keep being just that all their lives; seekers that are faithful to no one and always looking for the next guru, the next highest energy initiation or the new hype.

6- There is so much competition in between movements that it becomes a breeding ground for egos seeking power, recognition, prestige and control over others.

7- The chaos of the New Age is that lies mix with the truth and then it becomes very easy to get lost. The more people read books from dozens and dozens of authors, the more contaminate their psyche with foreign energies that establish within their minds.

We can write for hours about this topic but our perception is that the New Golden Era has to have as a foundation our beloved Father God, and also as the ultimate destination for all. All the rest is just stones to the true road towards eternal salvation for all. No we are not Christians :b

God Bless you now and always,

Cyndarion and Galitica
